# **E-Cigarettes & Vape Pens Generations**

# Cig-a-Like

E-cigarettes came onto the market around 2007.

Most delivered nicotine and were disposable.

### **Variations**

Variations on the first ecigarettes included products like ehookah and rechargeable versions.

### Vape Pens

These have batteries that can reach higher temperatures, have refillable eliquid cartridges, and allow users to regulate the frequency of inhalations.

## <u>Mods</u>

Large size, modifiable ecigarettes allow for more aerosol, nicotine, and other chemicals to be breathed into the lungs, at a faster rate.

#### Pod-Based

These ecigarettes are shaped like USBs and contain pods with higher amounts of nicotine than previous generations.
