To schedule a youth assessment or parent consultation, please contact: 713.914.0556

Service Descriptions

Mindful Choices - A high-risk behavior course that is evidenced-based, research driven and facilitated by clinicians who know and understand adolescent behavior. Participants learn how high-risk behavior affects their growing brain, refusal skills, anger and peer pressure management, stress reduction, and family communication skills within a fun, interactive environment.

Parent Group - This therapeutic support group is designed for parents of teens and young adults who struggle with substance use and behavioral issues. Participants learn techniques to prevent or stop high-risk behavior and behavior modification skills.

Adolescent Psychotherapy Group - This group offers a more experiential and intensive processing experience for teens and young adults who struggle with high-risk behavior, co-occurring mental health issues, and/or behavior problems. Participants work on increasing social skills, self-esteem, and impulse control in a safe environment.

Parent Coaching - Designed for parents of adolescents and young adults who are struggling with any type of high-risk behavior. These sessions offer personalized coaching from a master's or doctorate level therapist regarding referrals or family contracts that create lasting behavioral change.

Individual, Family or Couples Counseling - During individual therapy, the teen learns why they began using substances, what triggers their use, and new coping skills to deal with high-risk situations. Family therapy will empower all members to have an assertive voice, and learn validation and behavior modification strategies to shape attitudes and behaviors.

You know a teen
who needs us.
